

## Fellowship in Neuroimmunology

### ***Description***

A fellowship is available from April 2022 in the Molecular Neuroimmunology laboratory headed by Elisabetta Volpe at the Fondazione Santa Lucia in Rome.

The research team is especially interested in studying immunological mechanisms involved in neuroinflammatory diseases.

The overall objective of the work is to better understand the cross-talk between immune cells and glial cells in multiple sclerosis.

### ***Qualifications***

We are looking for a highly motivated graduate students (Biology, Biotechnology, Pharmacy, or Pharmaceutical Chemistry and Technology) interested in molecular and cellular immunology. Preference will be given to candidates with a PhD, and proven expertise in the following techniques: flow cytometry, cell culture, molecular biology, handling of human and murine samples.

### ***Application details***

CV should be sent to [e.volpe@hsantalucia.it](mailto:e.volpe@hsantalucia.it)
